

# The Shiloh Shepherd Registry

## A Shared Vision, A Common Goal

Dear Breeder/Owner's:

Enclosed you will find a chart that you need to fill out for EACH dog you own when applying for your permanent registration certificate. Please be HONEST in your evaluation. If you are not sure, please contact the Breeder of your dog or someone else that is familiar with the Shiloh Shepherd breed.

This information will be kept on file with the TSSR and is VERY CRITICAL to the future welfare of our Breed. Please take the time to read the following suggestions carefully.

1. Please print or type in all of your dog's information in the appropriate spaces on the second page of this form.
2. Please LOOK at the enclosed chart-Read items 1-92 carefully-THEN CONCENTRATE ON YOUR DOG. Now look back at the chart and circle faults that apply to YOUR DOG; then circle the VIRTUES. Faults—things that are missing or could be better/Virtues—things that are really nice about your dog.
3. Now you need to choose 7 numbers out of the 92 that BEST DESCRIBES YOUR DOG. (Please list them in the order of their importance 1-7 and put them on the Dominate side of the sheet.

**Example:** Start by looking at your dogs head-does he look more feminine? Then he would be listed as having a "bitchy" head. Do his ears "kite-out" (meaning lean more out to the sides then straight up)? Does he have a bad bite, missing teeth? Or—does he look alert and noble? Does he have a broad head? Are his eyes round or almond shape? What is the biggest FAULT you see in your dog? Is he perfect in STRUCTURE except for a hook tail? Then you would mark #76. Is he heavy boned, yet short and stocky? Then you would mark #74. Does he have any missing teeth? Then you would mark #02.

If you are having a difficult time with this form, please either call your breeder or have someone with Shiloh experience help you. When you have decided on the faults and virtues your dog possesses, list them 1-7 in their importance under the DOMINANT FAULTS AND VIRTUES column.

Having completed your dog's information and his/her dominant faults and virtues you must then send this form to your breeder. It is the DOG's BREEDER that must complete the RECESSIVE FAULTS AND VIRTUES and sign this form showing their approval. The recessives are the faults and virtues most prevalent and important in the littermates of your dog or history of the breeding lines that your dog comes from. Your Breeder should have this information, or have the means to get this information.

Please remember, there is NO such thing as a perfect dog. Please be fair and honest in listing your dog's faults. Please understand that this program is designed for the FUTURE well being of our Breed. If your dog has "kite ears" but Fantastic hips, Super intelligence, huge size etc., that does not mean your dog should not be bred due to his kite ears. What it does mean is that your dog should not be bred to another dog with kite ears. This is why the information in our Registry Breeding Profiles is so very important! Please do your part to help us maintain the absolute highest standards possible.

Thank you for your cooperation,  
TSSR Registrar

#### Please Note:

It is best to contact your breeder to assist in completing this form. Further, it is your dog's breeder who must complete the recessive faults and virtues

# Genetic Faults and Virtue List

## GENETIC FAULTS

01. Overshot or Undershot Bite
02. Missing or Extra Teeth
03. Light or Faded Muzzle
04. Roman Nose
05. Soft / Weak Ears
- 06 Kite Ears (leaning off to the sides)
07. Oversize (too tall) or Bonnet Ears
08. Round / Protruding / Droopy Eyes
09. Inadequate Stop
10. Narrow or Snipey~ (Bitchy) Head
11. Neck Too Long / Too Short /Weak
12. No Wither / low Stationed
13. Flat Chested / Poor Shoulder-Front Assembly
14. East/West Front/ Pinched Elbows
15. Soft/ Weak/ Sway Back
16. Roach Back/ Short Coupled
17. Too Long Bodied
18. Umbilical Hernia (Incomplete abdominal closure)
19. Narrow / Weak Hindquarters
20. Cow Hocked / Faulty Rear Drive (narrow thigh high hock)
21. Skinny/Extremely Narrow Structure
22. Poor Structure /Too Short and Stocky
23. Undersized / Small Fine Bone
24. Steep / Flat Croup / Poor Tall Set
25. Short/ Hook/ Kinked/ Gay Tail
26. Hare Feet (extra long toes) /Soft-Splay Feet
27. Weak Pasterns
28. Extra Long/ Curly/ Wooly Coat
29. Too short open or close coat
30. Faded Pigment/ Washed out Colors
31. Skin Allergies/Dermatitis / Mange
32. Gun Shy-Extreme Noise Sensitivity
33. Shy Temperament (overly cautious)
34. Sharp-Shy Temperament (non-approachable)
35. Spook-Coward Temperament (extremely fearful)
36. Unstable Temperament (unpredictable)
37. Cardiovascular Disorders (PDA)(PRAA)(AV/LVE)(SAS)
38. Cancer
- 39 Digestive Disorders (Mega-E, Bloat, IBS)
- 40 Elbow Dysplasia
41. Hip Dysplasia-Shallow Acetabulum, Severe Subluxation
42. Monorchid-Cryptorchid- Testicular Atrophy
43. Neurologic Disease
44. Ophthalmology Disease (eyes)
45. Pancreatic Insufficiency (EPI)
46. Severe Panosteitis
47. Reproduction Disorders
48. Other (Dewclaws, etc)

## GENETIC VIRTUES

49. Herding Ability / Excellent Agility
  50. Schutzhund (working quality)
  51. Super Intelligent (problem solver)
  52. Easily Trained (responsive-willing worker)
  53. Good Temperament (very sociable)
  54. Alert and Noble Bearing ( the .look of an eagle.)
  55. Good Hips (exceptional genetic strength)
  56. Good Bite (genetically correct dentition)
  57. Strong Lower Jaw, Even Muzzle
  58. Good Ears (correct as per standard)
  59. Strong Ears (naturally erect by four months old)
  60. Broad Head (correct as per standard)
  61. Almond Eyes (expressive, dark, well formed)
  62. Good Nose (exceptional air scent-tracking ability)
  63. Muscled Neck (strong, perfectly proportioned)
  64. Wither-High and Well Defined
  65. 45° Chest-Wither-Elbow (perfect front)
  66. Deep Chest-Strong Well Balanced Front
  67. Good Strong Top Line (as per breed standard)
  68. Excellent Hindquarters (as per breed standard)
  69. Extra Wide Rear-Exceptionally Strong
  70. Perfect Saber Tall-Well Set In Croup
  71. Leggy (with good stifle and hock)
  72. Well Bent Hocks-Well Rounded Stifle
  73. Excellent Feet and Pasterns (as per breed standard)
  74. Broad Stocky Body with Well Sprung Ribs
  75. Extra Oversize (bitches over 28"-males over 30")
  76. Heavy Exceptionally Thick and Oval Bone
  77. Super Structure-Perfectly Balanced (as per breed standard)
  78. Excellent Movement (perfect flying trot)
  79. Well Balanced-Easy Flowing Movement
  80. Excellent Stamina, Vigor and Vitality (mental & physical)
  81. Other
- The following code numbers are used only in the case of known recessive genetic characteristics (prefixed RGC) for use in documenting the past generations of the dog.*
82. White Recessive (In first three generations)
  83. Black Recessive (In first five generations)
  84. Smooth Coat (only out of plush parents)
  85. Plush Coat (only out of smooth parents)
  86. BI-Color Alleles (In first three generations)
  87. Sable with No Black/Tan Factor (In 1<sup>st</sup> four generations)
  88. Aloof Temperament (totally loyal-devoted to family only)
  89. Hard Temperament (independent)
  90. Medium-Hard Temperament (protective)
  91. Medium-Soft Temperament (very sociable)
  92. Soft Submissive Temperament
